

Discover the T20™ sliding top for enhanced imaging access and ease of use

- Powered 9.8" (250mm) traversing top¹
- Capable of 660 lbs. (300kg) maximum patient weight²
- X-ray translucent tabletop
- 28" (715mm) - 44" (1115mm) height range³
- Slimline column offset relative to top and base
- Tabletop break offset from column
- Narrow T-shaped base
- Head and leg sections are lighter for ease of handling
- 22" (560mm) wide top plus optional width extenders for obese patients
- Full length X-ray cassette tunnel accessible from either end
- RS232 port for system analysis and diagnostics
- Interchangeable and removable head and leg sections
- Corded handset with battery status indicator
- Acrylic-capped ABS top and base prevents fluid ingress, is easy to clean, scratch resistant and hard wearing
- Choice of mattress thickness: 2" (50mm) or 3" (75mm)
- Pressure-reducing mattress pad is completely sealed (no seams)
- Aesthetically pleasing
- Non-intimidating to the walk-in patient
- Simple mattress fixings, **no velcro**
- Mattress spans the break for improved patient support and easier cleaning
- Ergonomically-designed foot pedals

Corded handset with battery status indicator

The lightweight handset is colorful, intuitive to use and can be secured and operated on either the side bars or the end of the head/leg section. The handset also features a practical battery status indicator.
