Datascope Duo™

Compact, Lightweight and Portable

Duo is a portable vital signs monitor ideal for low acuity areas of your hospital. It will satisfy your needs for a portable NIBP monitor for both adult and pediatric populations. Duo provides accurate blood pressure and pulse rate readings while being easy to use and convenient to transport from patient to patient. An intuitive monitor, the Duo features a touch button user interface and requires no menus. Take a look at this powerful little monitor. Duo's capabilities are sure to impress you.

Datascope Duo™
