105 Power Examination Table

Reliable, practical, inexpensive

Great styling and two-way power make the 105 an excellent investment.

The 105 powers down to a low height of 26", up to 36½"—or anywhere in between. No footstep needed. No lifting of elderly, infirm or pregnant patients. A toe touch puts the back into any position from horizontal to full chair. Easy for your patients, easy for you.

Head and foot sections extend over base. You can work in close, avoid stretching and bending. Perfect for pelvic exams. Infinitely adjustable stirrups offer four lateral adjustments.

Bulk storage plus two large color coordinated drawers at the foot end provide more than 3½ cubic feet of storage. A bulk storage area, accessible from either side of the table, gives you plenty of room to store larger instruments and equipment.

A duplex, hospital grade electrical receptacle lets you use exam lights or additional instruments without tripping over cords. Head section with built in pillow conceals paper roll holder. Paper straps hold paper in place.

Standard Soft-touch top is 54" long and extends to 72" with pullout foot section. Leveling screws at each corner of base allow a solid mounting, even on uneven floors.

It's easy to care for the 105's vinyl upholstery with its clear, protective Print-Lock finish.

Order the 105 in any of the five Ritter upholstery colors: Rosedust, Victorian Teal, Larkspur Blue, Slate Grey or Warm Grey. Panels are available in Rosedust, Victorian Teal, Larkspur Blue or Slate Grey.

Specifications

Minimum Height	26" (66 cm)
