What does good value mean to you?

"I want value as I define it: quality equipment that helps me care for my patients. Ritter exam tables provide exactly what I need. They're not only cost effective, but are patient-friendly, and provide years of durability. Ritter exam tables make it easy for me and my staff."

204 Manual Exam

Designed in collaboration with experts

What makes Ritter the most purchased brand of exam tables in the industry?

It's our willingness to research, study and listen, so that we can meet your needs... and the needs of your patients.

We found that you need...

- an exam table that allows easy access for patients, making them feel secure
- three side drawers for optimal supply management
- modern styling to coordinate with your office
- an updated, ergonomic top design to help patients feel comfortable
- additional weight capacity to handle heavy patients

The result of this research? *The Ritter 204 Manual Exam Table*. Featuring the latest in design, comfort and functionality in a manual exam table, it truly offers efficient patient care.

One-Piece Seamless Drawers

One-piece seamless drawers have easy-to-clean rounded edges and are designed to contain spilled fluids, keeping them from other areas of the table, thereby improving infection control.

Amputation Table

Stylish & Easy to Clean - The ergonomic design of the upholstered top is as soft and comfortable as it looks, leaving your patients feeling more relaxed. The seamless upholstery eliminates areas where dirt and bacteria can accumulate so clean-up is easier, faster, and more effective.

Removable Top System - The one-piece, upholstered top can be easily removed without tools, allowing a thorough cleaning or a quick upholstery color change.

Enlarged Footstep - We increased the size of the footstep over 40 percent above the industry standard. This allows patients to feel more secure and get on the table more confidently... putting minimal strain and stress on physicians or their staff.

The step has an easy-to-clean, slip resistant surface with rounded edges for added security. And, the step is reinforced with steel to minimize deflection, providing the patient an increased sense of stability.

Storage Access and Volume

Our pass-through side drawers provide access to supplies from either side of the table and give you the ability to change your room configuration when you want to.

Three spacious side drawers provide plenty of storage volume for gowns, drapes, and other items, yet are made to help organize your assortment of smaller supplies and bulk supplies. In addition, there are two front drawers for easy access to items during pelvic exams.

Increased Weight Capacity

Today's increasing patient weight puts added demands on exam tables. The Ritter 204 is designed to safely support more weight than standard manual exam tables – 500 pounds.

Consider a Barrier-Free Table...

For Your Patients and Your Practice

Gone are the days of limited special handicap-accessible exam rooms. With Ritter Barrier Free™ tables, more of your exam rooms can be accessible to special needs patients. This not only puts patients at ease, but also makes your practice more efficient.

Of course, your staff will love the Ritter 222 or 223 more than anyone. An examination table that lowers to 18 inches from the floor means they don't risk injury from lifting patients. Ease of use and accessibility also mean increased efficiency and an overall increase in patient throughput.
