Ritter 75e

S P E C I F I C A T I O N S

The Ritter 75e, a truly universal power table with eight-way power, allows you to precisely and effortlessly position patients for a multitude of universal procedures. In fact, because so many functions of the table itself are powered, not manual, almost any medical examination position can be achieved effectively... without putting strain and stress on you, your staff and patients.

The 75e is dependable... flexible... easy to operate. After all, on how many tables can you securely cradle and examine a three month old child and seconds later have the child's mother ready for her exam, in the seated chair position, on the same table? The 75e's power height, back, foot and tilt functions, all operated by an easy to use foot control, work together to give you superior positioning for all your patients' procedures, while at the same time reducing their anxiety. Its power low height of 26" eliminates you and your staff bending and stooping to lift patients onto the table surface. Once your patient is on, you can fine-tune their positioning with the power back, foot and tilt to maximize their comfort.

You save time and have a more effective working situation for everyone because when your patients feel relaxed, so do you.

Features and accessories like a removable foot section, articulating headrest, knee break and adjustable stirrups are as durable and functional as the 75e itself. Truly a "workhorse" and stable table, it won't move, rock or tip, even when fully extended in the Trendelenburg position. Speaking of durable, a sculptured, form-fitting cushion made of seamless upholstery, makes clean-up faster and more effective. Choose from Iris Blue, Nile Green, Terra Rosa, Royal Lavender, Slate Grey or Sand Grey... any of the six Ritter colors which complement its design.

Features

Power height, tilt, back and foot, foot control, articulating headrest, infinitely adjustable stirrups that lock in one of three lateral positions, treatment pan, paper roll holder hidden under the headrest, paper holding tear straps to keep paper in place, quick release upholstery top and leveling screws
